Address: Kabul Afghanistan

Hello dear reader. First of all, thank you for making a person achieve their dreams of hiring in the job that he likes and loves. I am one of those people and I will be happy to work with you and make your company grow. My love for web design and web development began in 2018 when I was a school student and I was just surprised to see an instructional video and I started this journey and I will continue to this journey. In the same year 2018, I started following web design and web development courses, and read this section until 2020, and the same course left us web projects, where we both learned for two years and worked on web projects with them.

After that course, my work went well and everyone asked me to work with them. At that time, students studying at the best university in Kabul in the field of computer science (software department) asked me to make their monograph, it was amazing for me. Because they had read this section for 4 years, but I only read it for two years. They were amazed at the outcome of my work! I was very interested in this part, maybe they were not interested and it was my interest that made me successful.

From 2020 to 2022, I worked with different companies and people, and most of the time it was my job remotely.

And from 2022 to 2023, I taught web design in one of the personal courses of Kabul, which was called Layiqzai Academy.

Finally, I would like to say that if you do not consider me suitable for this job, then hire a person who is interested in this job, because without being interested in a job, that job becomes the enemy of the worker, and that worker is at war with his enemy and destroys everything. Thank you for giving your time to us.

Sincerely, Saber Noorzai

Saber Noorzai

Web designer & developer

About me:
